20.3 The Licensees acknowledge and agree that, unless the contrary intention is expressed, any approval or consent granted by the Minister or any servant or agent of the Minister pursuant to this Licence:

(1) is without prejudice to the Licensees’ rights and obligations under this Licence or at Law and does not relieve any Licensee from any such obligations or restrict such rights; and

(2) does not amount to an acknowledgement by the Minister, or any servant or agent of the Minister, that the actions to which the consent or approval relates comply with Good Industry Practice or Law.

21. JOINT AND SEVERAL LIABILITY

4. The Licensees shall prepare a detailed construction constraints schedule demonstrating compliance with the ecological sensitivities of the Licensed Area. This shall address the particular periods of sensitivity for birds, fish and wild mammals,
and shall include details of the timing of construction works and protection measures for each of the protected species concerned. The construction methodology and timing shall be agreed with Dúchas and shall be included as part of the EMP.

5. The status of protected species at all construction sites shall be ascertained by survey. In the event that any such species are found, the Licensees shall notify Dúchas and shall comply with the requirements of Dúchas under relevant Law.

6. The timing and methodology of any additional survey work to be carried out shall be with the prior approval of Dúchas.

7. A benthic survey of the area adjacent to the seabed diffuser at the end of the Discharge Pipeline shall be carried out in consultation with the Marine Institute prior to the commencement of discharges.

8. The Licensees shall establish continuous lines of liaison with the Erris Inshore Fisherman’s Association, the Killybegs Fishermen’s Association and recreational users of the Licensed Area.

9. Prior to the commencement of construction work involving drilling and/or blasting in the Licensed Area, a detailed method statement, prepared in consultation with Dúchas and cetacean experts, to detail monitoring and mitigation measures for cetaceans shall be provided to the Minister.

10. Prior to commencement of any construction works in the Licensed Area, the Licensees shall:

   (a) provide, to the satisfaction of the Minister, details of monitoring programmes to be undertaken. The proposed monitoring programmes shall be submitted prior to the commencement of each specific phase of construction. Detailed monitoring programmes shall be submitted for the approval of the Minister in respect of the following activities:

      (i) impact of the Facilities on seabed conditions and benthos in the Licensed Area; and

      (ii) impact of the discharge from the Discharge Pipeline on water chemistry, sediments and biota, subject to any Pollution Control Licence;

   (b) forward to Dúchas for assessment of the potential archaeological implications a map or maps showing:

      (i) the proposed location of the Facilities within Broadhaven Bay;

      (ii) dredge zones; and

      (iii) areas of submerged peat; and

   (c) appoint a project archaeologist, who will act on behalf of the Licensees as a focal point for liaison with Dúchas in relation to all matters pertaining to archaeology.
11. Immediately prior to and during construction of the crossings of Sruwaddacon Bay, monitoring of suspended sediment loads shall be undertaken within the confines of Sruwaddacon Bay and for a reasonable area outside Sruwaddacon Bay.

12. The Facilities should avoid areas of submerged peat.

13. The results of the geophysical surveys already completed shall be assessed by an archaeologist and a report on this assessment shall be forwarded by the Licensees to Dúchas for consideration.

14. For the duration of the construction phase of the project, the Licensees shall:

   (a) maintain contact with the Development Applications Unit of Dúchas and comply with all requirements of Dúchas made in the exercise of its statutory functions in relation to activities along the route of the development or otherwise in connection with this Licence;

   (b) seek the advice of Dúchas on finding any material of an archaeological nature in or adjacent to the Licensed Area and shall cease all works in the relevant areas until Dúchas agree that works should be resumed and comply with any conditions specified by Dúchas in relation thereto;

   (c) as Broadhaven Bay is an area of high archaeological potential, ensure that archaeological monitoring is carried out in respect of all dredging works. This should be carried out by a suitably qualified maritime archaeologist and licensed under the National Monuments Acts 1930-1994. If material of archaeological significance is discovered as a result of such monitoring, further archaeological mitigation may be required such as preservation in situ, avoidance or excavation. Dúchas shall advise on such issues and the Licensees shall comply with any conditions specified by Dúchas in relation thereto;

   (d) ensure that guard vessels or other appropriate protection methods are used to prevent snagging of fish trawl nets on the ends of any Facilities prior to tie-in; and

   (e) appoint a competent liaison officer, whose functions shall include informing fishing vessels, other shipping and recreational users of the construction taking place in the Licensed Area.

15. The Licensees shall:

   (a) on or before completion of construction of any Facilities in the Licensed Area, furnish to the Minister and the Marine Survey Office plans showing the exact location of such Facilities; and

   (b) within two months or the completion of construction of any Facilities in the Licensed Area, give notice of such completion to the Minister and the Marine Survey Office.

16. Discharges from the Discharge Pipeline shall be treated to at least EQS as specified in the Licensees’ Environmental Impact Statement using best available technology.
17. The Minister notes the OSPAR recommendation, signed at Sintra on 23 July 1998 ("OSPAR Recommendation") that, by 2020 members should aim for zero emissions of certain hazardous substances into the marine environment. The Minister requires that discharges from the Discharge Pipeline should be treated in such a way as to minimise emissions of such hazardous substances to the greatest possible extent. The Minister also recommends that the Licensees meet the OSPAR Recommendation at the earliest possible date and in any case, prior to 2020.

18. Works or measures which would materially adversely impact upon protected species shall be avoided.
